

Installation Procedure for MODEL DIT SELF-RIMMING DROP-IN TUB

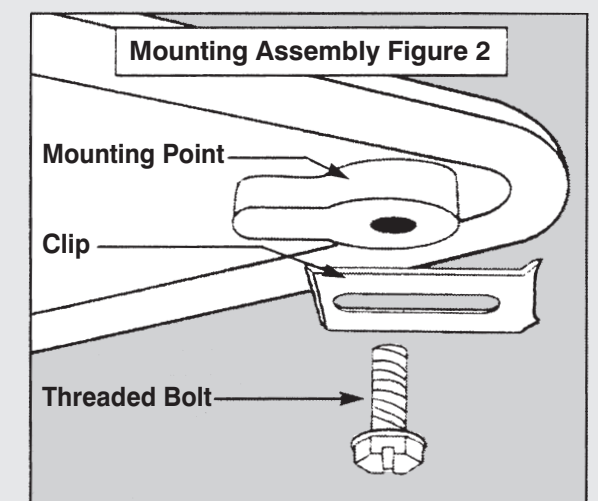

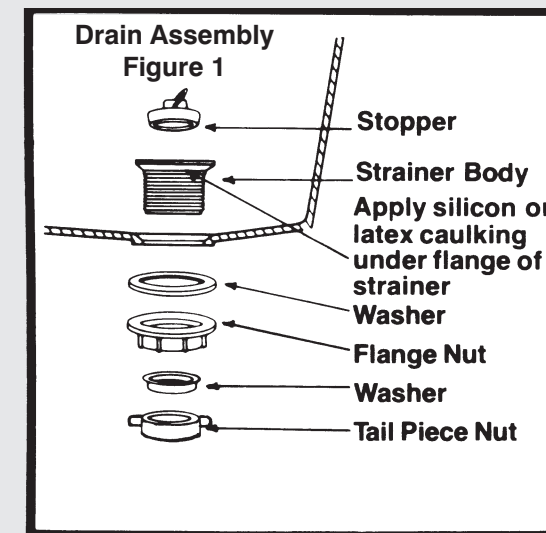

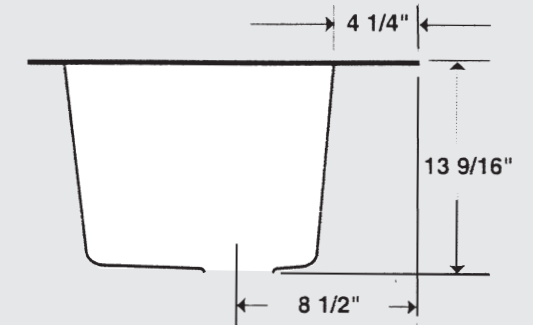

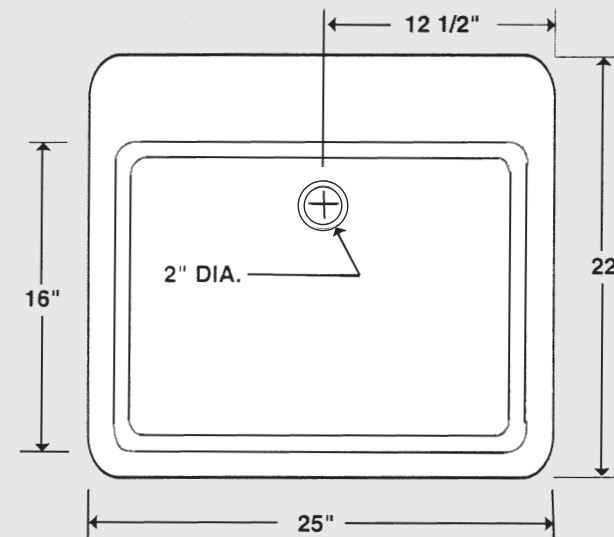

Read ALL instructions carefully BEFORE starting your installation SELF-RIMMING DROP-IN TUB - CAPACITY 17.50 GALLONS

1. Measure and cut counter hole for tub insertion 23-5/8" wide x 20-5/8" long. Test fit tub. File any areas which require widening.
2. After test fitting tub, remove from counter hole and install faucet (not included) and drain assembly (see Figure 1).
3. In the installation of the DIT, DO NOT use the white washer in the installation process. Use of the white washer may cause the drain to seat improperly and cause water to pool around the drain area.
4. Set sink into place and assemble bracket, washer, and nut attachments (see Figure 2). Alternating from one to another, lighten mounting bracket assembly nuts.
5. Some caulking residue may flow from under tub flange. This residue can be wiped clean following instructions on silicone or latex caulking tube.
6. Attach drain waste and faucet plumbing as desired.
